## Projects

**2018-08 - present**

### Salty Dog - Lead Developer
*Salty Dog has numerous retail stores, restaurants, cruise ships, charter company and more*
For the last year, I have worked as the only developer for Salty Dog Inc. I have experience in Javascript, Jquery, PHP, HTML, and CSS. In addition, I have been the sole person responsible for our server and I have shot and edited video that is used on our FB page and our youtube channel to garner more sales on our online store. Over the last year, I have had to learn under fire and on my own. When I started I did not know anything about PHP or servers and it was my first job as a developer so I was very inexperienced in coding in general, However, over the course of the year, I have built every app, every functionality that they threw at. So even though I am still inexperienced I now know that I can figure out anything anybody wants to throw at me. If you are looking for a junior developer with senior developer experience give me a call.
